Subject: 11 Sept 2017 -- ASPECT final -- 1720
Date: Monday, September 11, 2017 5:29:33 PM

ASPECT has completed flight operation for Harvey today which included flying the remaining RMP sites in the greater Houston area.

The survey consisted of 66 RMP points for which all were surveyed. Data is being pulled from the aircraft at this time and will be processed and posted on 12 Sept 2017.

The FTP site is current up through Flight 24 with an estimate that Flight 25 will be posted later tonight. The n-link for flight 24 has been uploaded. It is anticipated that all FTP and n-link data for all flights (up through 26) will be uploaded and finalized on 12 Sept 2017.

Many thanks for having the ASPECT program support the mission!
